

Small Beaded Snowflake

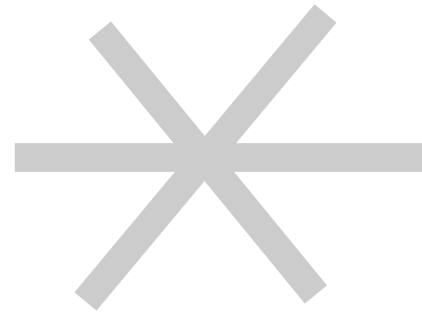

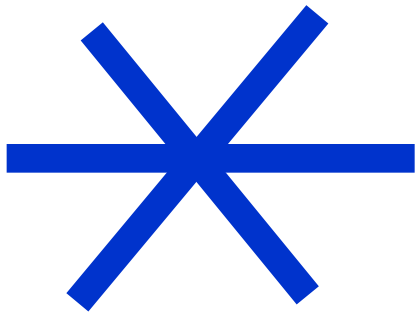

STEP 1

Cut a pipe cleaner into three equal pieces. (This is easiest if you have a ruler to measure with or if you fold it into thirds first).

STEP 2

Twist the three pieces of pipe cleaner together in the middle to make a starburst (or spider!) shape.

STEP 3

Thread beads onto each of the spindles (or spider legs!). Use a variety of beads to make your snowflake unique. You may use any of the beads you choose, but try to make each spindle (or spider leg) the same.
